

TOUR-X 4 FEATURES

Ventilation

Easy to clean diffusers create a strong venturi vacuum at the rear. Dual intake for increased airflow and lower noise level. Under-peak air intake collects and directs cool air into the helmet. Closable chin vent controls the airflow to the chin area. Inner chin vent shutter prevents debris coming into the helmet in dusty riding conditions. Brow ventilation, lower side vents and neck roll exhaust.

General

- ✓ Outer shell SFL

Front ventilation

- ✓ Dual intake
- ✓ Standard brow vents**
- ✓ Three position chin vent
- ✓ Inner chin (bar) vent shutter

Rear ventilation

- ✓ Neck exhausts vent
- ✓ Removable diffusers
- ✓ Side exhausts

Aerodynamics

- ✓ Pull Down Chin Spoiler

Visor

- ✓ Pinlock insert lens included

Interior

- ✓ Dry-Cool® Liner**
- ✓ Replaceable Cheek Pads
- ✓ Replaceable Interior
- ✓ Replaceable Chinstrap covers
- ✓ Facial Contour System (FCS)
- ✓ 5mm "Peel Away" Cheek Pads

Comfort

- ✓ Emergency Release System (ERS)

Approval

- ✓ ECE 22-05

** Innovated and exclusively offered by Arai

TOUR-X 4
Frost Black

Available sizes: XS-XXL

Innovative peak

The Arai peak scavenges and forces air into the forehead vent ports for cooling. Maximum protection against sun glare for better vision.

5mm "Peel Away"

Giving even more ability to craft the perfect fit and comfort, the cheek pads and the temple crown pads now feature a 5 mm peel away layer for added room if needed.

Outer shell SFL

Special Fibre Laminate
Strict quality controlled construction using special fibre layers, crowded with fibres right to the shell surfaces and bonded with special resins formulated by Arai, to disperse impact energy over the widest possible area – the shell's main job – through strength, structural integrity and impact flexibility.

Replaceable interior

Cheek pads, ear cups or the complete interior may be easily removed. All parts (replaceable or not) can be cleaned with lukewarm water and mild soap. Rinse well after cleaning and never dry in direct sunlight or near a heat source. Interior parts in different size thickness are available for a custom fit for every rider.

FCS (Facial Contour System)

To offer an even better snug fit and enhancing the comfort to the lower jaw, the Facial Contour System (FCS) works with a foam spring support in the cheek pad that compresses and rebounds, providing the necessary support without excessive pressure.

GENERAL ARAI FEATURES

Five times inspected

Each Arai helmet goes through five separate quality-control departments: after the shell is made, after painting and graphic completion, after assembly and two in-process inspections.

Washable interior

The premium quality interior of any Arai helmet can be easily cleaned, in place, with mild soap and lukewarm water

Handmade

It can take up to five years for our experts to earn the right to create an Arai shell. Each shell can take up to 27 steps and to build one Arai helmet will take about 18 man-hours.

All-day comfort

All-day comfort with the Arai interior fit and shape together with the finest liner materials and the extensive ventilation system. And thanks to the perfect balance and weight distribution of the helmet, you hardly notice you are wearing an Arai.

Penetration tested

All Arai helmets are penetration tested, although not required by European helmet standards. The Arai penetration test is performed with a 3kg test cone that strikes from a height of 3m on the helmet.

Double-D ring device

The flat and D-shaped rings fit smooth against the chin. No moving parts, no corrosion problems and just pulling the tab is enough to loosen the fastener.

Smooth shape, better protection

The smooth outer shell of Arai helmets is designed to glide without unnecessary resistance. You don't want to decelerate your helmet more than necessary. That's why all Arai vents and ducts are designed to break off during an impact.

Hard outer shell, soft inner shell

Arai uses a very hard outer shell to spread impact forces and a soft inner shell to absorb remaining energy. The multiple-density EPS inner shell is made using a unique technology of combining three to five densities in various areas as a single component.

Organic shape

The organic shape of an Arai outer shell offers a more natural appearance, seals better and conforms more to the head's natural shape for improved comfort, fit and to help minimize wind turbulence.

5-year limited warranty

All Arai helmets are warranted against defects in materials and workmanship, and are serviceable only for the properly fitted first user for 5 years from date of first use, but no more than 7 years from date of manufacture.

Different outer shells

Unlike many other manufacturers Arai provides one size outer shell for each two-helmet sizes for most models. Together with different shaped outer shells for different models it is almost impossible not to find the fit you are looking for.

Arai In-house test

This Arai helmet is designed to meet the stringent Arai In-house standard requirements, in addition to mandatory standards such as ECE 22-05 and voluntary standards such as SNELL M2010.
